

ABSTRACT

A resin composition comprising: (A)
particles prepared by bonding at least one oxide of an
5 element selected from the group consisting of silicon,
aluminum, zirconium, titanium, zinc, germanium, indium,
tin, antimony, and cerium, and an organic compound
which includes a polymerizable unsaturated group, (B)
an oligomer-type radiation polymerization initiator
10 having a site which generates photo-radicals by
irradiation of radioactive rays, and (C) a compound
having at least two polymerizable unsaturated groups in
the molecule.
